

# LEAN-TO

FOR STOREFRONT CART RETURNS

Brasco's Lean-To cart corrals are designed for retailers with cart return locations at the front or side of stores. These corrals are engineered to meet local wind and snow load capacities, are made from aluminum and have a life expectancy of 20+ years.

All roofs arrive pre-assembled, reducing installation time and cost. Easily tailor this corral to meet any store brand by choosing the powder coat color of preference for the frame and select from structured polycarbonate, acrylic or standing seam aluminum for the roof glazing. For locations with inclement weather, this corral style offers optional wall glazing panels for more protection.
