# BUILD YOUR SHELTER

## ARCADE SERIES

A unique design coupled with innovative features makes the Arcade Series Shelter the ideal choice for elevating your next bus shelter project. Due to the unique triangular header and integral gutter system, this design offers wider spanning barrel roofs that provide excellent protection from the elements. With a pocketed design, the bold round columns conceal all assembly hardware and connections, providing a vandal resistant addition to any transit system. Using the Arcade shelter's glass design allows customers to incorporate public art or branding, creating a truly customized bus shelter that stands out from the rest. Brasco's collaborative, client-centered approach guarantees that each project's unique expectations are exceeded.
