

# ARCADE

BOLD, URBAN ELEGANCE

The Arcade transit shelter derives from our Eclipse series and utilizes the same column and frame components. What sets the Arcade apart is its triangular header with integral gutter system and wide barrel roof span.

The Arcade is available with a curved roof and three glazing material options. Cantilevered roofs offer the narrowest footprint and are ideal for limited pathways.

The Arcade is powder coated for tailored branding and you can customize the wall glazing with a variety of graphics options.

Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.

**Below:** Barrel roof with bronze tempered glass walls, solar lighting, and ad box.

## Standard Specifications

### WIDTH

5'

### LENGTH

8', 10', 12', 16', 20'
