

ASPEN

NATURALLY BEAUTIFUL
BIKE SHELTER

The Aspen offers modern lines with a bright, airy feel thanks to the transparent roof. Available in standard powder coat or for a custom look, select from any of Brasco's custom woodgrain finish options. A woodgrain powder coat finish provides the feel and texture of real wood but without the maintenance and deterioration.

The Aspen's aluminum slat walls offer airflow with moderate weather protection, so this shelter is ideal for warmer, drier climates. For more protection, replace the slats with full coverage glazing, or select a combination of the two.

Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.
