ECLIPSE

BOLD, VERSATILE BIKE SHELTER

The Eclipse Series is easily modified for a bike shelter with its bold round columns and sharp blade rafters.

This design features pocketed columns and header to conceal hardware and provide unparalleled structural integrity. Available in arched roof only.

Standard elements include powder coat painted finish and aluminum, acrylic, or structured polycarbonate roof glazing. The Eclipse Series is ideal for Brasco's low profile flex solar panel and header mounted battery box lighting package, front windscreen, or ad box.

Brasco's engineering team calculates all shelters to meet local wind, snow & seismic load requirements.
