

WOODGRAIN POWDER COAT

The woodgrain powder coat finishes that Brasco offers provide a genuine look of real wood without the ongoing maintenance and degradation that comes with real wood. To further replicate an authentic finish, our woodgrain powder coat finishes have a slightly textured surface. Since aluminum never rusts, it makes an ideal material for outdoor shelters and site furnishings. Mix and match our standard powder coating with woodgrain powder coating accents like bench slats or roof rafters. Samples available upon request for a fee.
